

Service and Support

Continuity for your data protection solutions

To support the needs of different customers in different industries, Overland-Tandberg is proud to offer 5x different levels of service and support.

The Overland-Tandberg™ vision is “Setting a new standard of customer centric excellence through global intellect and inclusiveness.” Our mission is enabling organizations to securely manage and protect their digital assets. We provide hybrid cloud data management, protection and archive solutions using our world class R&D design and factory operations. A long heritage, global presence, factory capability and customer support excellence is the foundation of our brands evidenced by our world wide customer base.

Return to Base (RTB)	Repair/replacement within 14 days of receipt of faulty part
-----------------------------	---

OverlandCare Bronze	Advanced parts replacement (two business days)
----------------------------	--

OverlandCare Silver	NBD onsite FRUs and NBD parts replacement CRUs
----------------------------	--

OverlandCare Gold	NBD onsite FRU/CRUs
--------------------------	---------------------

OverlandCare Platinum	24x7x4 onsite FRUs and CRUs (4hr. response, 365 days/year)
------------------------------	--

Overland-Tandberg products are manufactured to the highest levels providing customers maximum performance and reliability. Our global service and support teams are available in over 90 countries worldwide, providing support when you need it, 365 days a year.

Protecting data and maximizing the availability of IT systems is a critical business function. Overland-Tandberg has made selecting and obtaining the proper level of service and support for your product easy and affordable. Our service uplifts and warranty extensions serve as a complement to the standard product warranty, ensuring that our customers have the optimal level of service and support required to meet their individual needs.

Customers can choose to purchase service warranty uplifts up to a maximum of five years from the point of sale, or they can choose to purchase service warranty extensions on an annual basis. Service warranty uplifts may be purchased within 90 days of the initial hardware purchase, thereafter customers are required to purchase service warranty extensions. If a product warranty has expired for more than 60 days then a health check must be performed to ensure the unit is not faulty before a new warranty extension can be purchased.

In the unfortunate event that a new product fails within 30 days from purchase the failed unit will be replaced with a new unit from stock at no cost to the customer and the failed unit will be returned to Overland-Tandberg for analysis.

FRU = Field replaceable unit
CRU = Customer replaceable unit
