Agenda

- Introduction
- About Overland-Tandberg
- Titan Primary & Secondary Storage
- Closing | Next Steps

About Overland-Tandberg

- Minority-Owned/Black-Owned/MBE
- NMSDC Certified – Diversity Supplier
- **40+** Years delivering IT data management solutions
- Global footprint in **100+** countries (Americas, EMEA, APAC)
- **4** Hybrid IT Infrastructure portfolios

INTRODUCING THE OLYMPUS SERVER LINE

Tower and rack configurations for businesses that require value, flexibility, and a range of performance needs

Register for Replay | [OverlandTandberg.com/events](https://www.OverlandTandberg.com/events)

CRS
TITAN

The logo graphic consists of a thick horizontal bar at the top, from which three vertical bars of varying heights extend downwards, creating a stylized, symmetrical shape that resembles a classical column or a shield.

Titan Storage Solutions

2022

What's the opportunity for you?

Project Opportunities

Serve a data center project from one single source
addressing the SMB, SME, Midrange and Enterprise segments

- Olympus Servers
- Titan T2000: SAN & DAS solutions
- Titan T3000: PBBA appliance
- Titan T5000: Unified Storage
- Titan T6000: Scale-out Archive NAS

- NEO Tape libraries

Titan T2000 SAN/DAS storage

(based on Dell PowerVault ME5024 and ME4xx)

Titan T2000 reveals the business value of your investment

Titan T2000

Performance & Capacity

More processing power & capacity to support high-value workloads

Balanced Costs

Cost-effective balance of performance and price/TCO

All-inclusive Software

Everything needed by IT to store, manage and protect data

Management Ecosystem

Intuitive navigation, features and analytics for the IT generalist

Outcomes

Workload Diversity

Run it all from backup to DBs to HPC to Edge solutions & more

Affordable Entry Storage

IT is enabled to do much more and with less budget needed

Everything You Need

Easy to purchase and cost effective to own with no separate licensing

Simplified Management

Better quality & time saving management for the IT generalist

Titan T2000

Entry storage that's purpose-built and optimized for **SAN, DAS** and **Edge**

SIMPLE

Easy to install/configure; simple to manage;
proactive storage analytics; PowerEdge ready

FAST

Powerful IOPs; high bandwidth; fast host
connectivity; 12Gb SAS backend

AFFORDABLE

Low-cost configs & TCO; easy to own all-
inclusive SW; pay-as-you-grow

BLOCK STORAGE | MULTIPLE PROTOCOLS | HIGHLY SCALABLE | DIVERSE USE CASES

Titan T2000

Titan T2000 Technical Overview

Performance and capacity advancements

T2000

2U-24 drives

EBOD Expansion Enclosures

T2012X

2U-12 drives

T2024X

2U-24 drives

T2084X

5U-84 drives

9 x 2U enclosures behind T2000
3 x 5U enclosures behind T2000

Max Raw Capacity	System (7.68TB SSD)	184TB	9 x 2U enclosures behind T2000 3 x 5U enclosures behind T2000	
	Max.encls. (18TB)*	4.53PB		
Min/Max Drives		2/276		
Controllers		Dual		
Controller Memory		16GB per controller		
Storage as configured	4x 960GB SSD SAS ISE Read Intensive 12Gbps 512			
Networking Connectivity	16/32Gb FC, 10Gb iSCSI BaseT, 10/25Gb optical iSCSI, 12Gb SAS			12Gb SAS Backend
Warranty	3Y ProSupport and Next Business Day Onsite Service			
Operational Modes	Virtual (all data services) & Linear (performance-based)			
Performance	640K IOPs, 100% Sequential Reads, 16K block, R5, Virtual			
Throughput	12GB/s Read & 10GB/s Write			
HW Availability	5-9's (Dual controller mode only)			

Titan T2000X Expansion Enclosures

T2012X

2U-12x 2.5"/3.5" drives

- expand T2000 only
- Up to 9 enclosures
- SAS 12Gb/s drives
- connected via SAS

T2024X

2U-24x2.5" drives

- expand T2000 only
- Up to 9 enclosures
- SAS 12Gb/s drives
- connected via SAS

T2084X

5U-84x 2.5/3.5" drives

- expand T2000 or Olympus servers or any legacy server
- Up to 3 enclosures
- SAS 12Gb/s drives
- connected via SAS

Titan T2000 Front View

Mandatory quantity for T2000:
4, 8, 12, 16, 20, 24 drives
Mix and match is possible

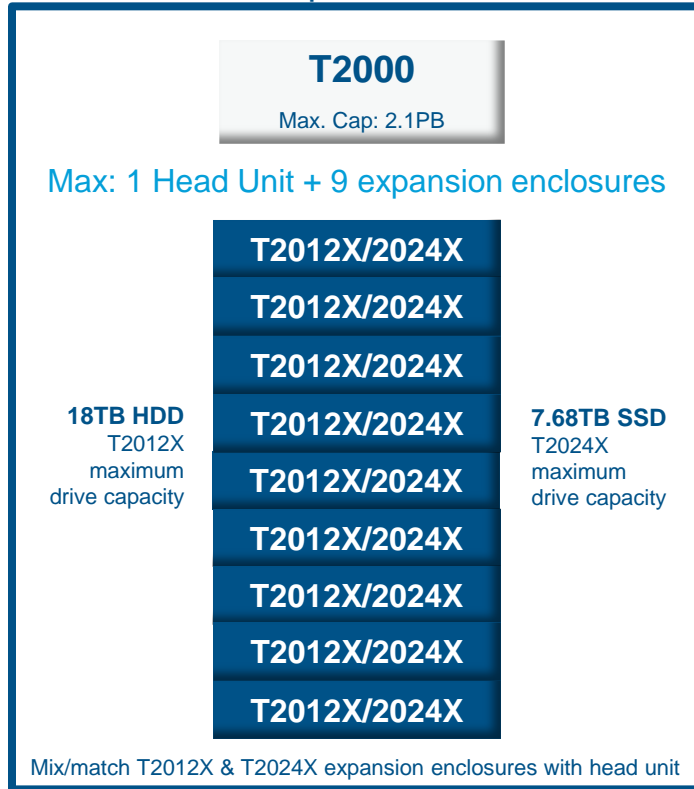

Titan T2000 Rear View

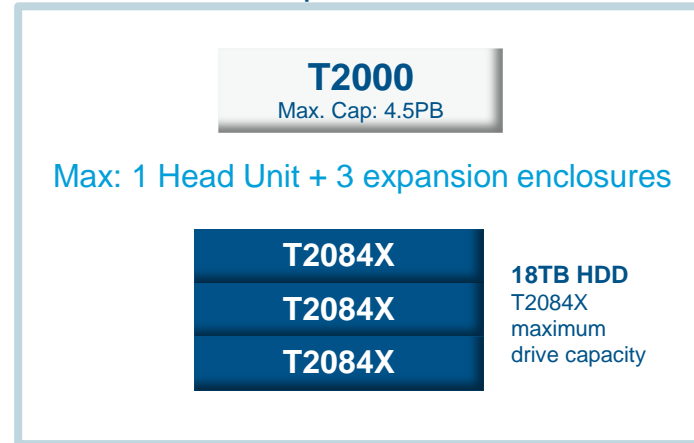

- 4 ports 10/25Gb iSCSI SFP+/SFP28
- 4 ports 1/10Gb iSCSI BaseT
- 4 ports 16/32Gb FC SFP/SFP+
- 4 ports 12Gb SAS

Titan T2000X Capacity Expansion Scenarios

Expansion 1

Expansion 2

Mixing 2U & 5U expansion enclosures is not allowed

Titan T2000 Drive Support

Flexibly configure as HFA, AFA, HDD-only

Drive Type	Capacity	RBOD		EBOD	
		T2000	T2012X	T2024X	T2084X
NLSAS 3.5"	4TB	N/A	Yes	N/A	Yes
	8TB	N/A	Yes	N/A	Yes
	12TB	N/A	Yes	N/A	Yes
	16TB	N/A	Yes	N/A	Yes
	18TB	N/A	Yes	N/A	Yes
10K SAS	2.4TB	Yes	Yes	Yes	Yes
SSD SAS	960GB	Yes	Yes	Yes	Yes
	1.92TB	Yes	Yes	Yes	Yes
	3.84TB	Yes	Yes	Yes	N/A
	7.68TB	Yes	Yes	N/A	N/A

Note:

Only these drives can be used in T2000 arrays and expansion chassis.

- RBOD – **Raid Bunch Of Disks**
- EBOD – **Extended Bunch Of Disks**

Mandatory quantity for T2084X:
28,42,56,70 or 84 drives
Mix and match is possible

Titan T2000 is All-Inclusive

No costly licensing makes T2000 easier to own, deploy and use

ADAPT RAID

Functionality enabling affordable capacity expansion & faster drive rebuild times.

Thin Provisioning

Allocate and consume physical storage capacity as needed in virtual disk groups

SSD Read Cache

Increase execution speed of application IO by caching previously read data

Asynchronous Replication

Replicate data over FC and iSCSI to any global location that includes mirroring, thin provisioned pools.

Snapshots

Scheduled & on-demand volume Copy on Write snapshots with rollback & refresh options

Auto-Tiering

Improve performance and efficiency with less hardware expense

Linear Mode: ADAPT, CloudIQ, CLI, Management, SupportAssist, Encryption

ADAPT: Autonomic Distributed Allocation Protection Technology

Virtual Mode: All software available for use

Titan T2000 is All-Inclusive

No costly licensing makes T2000 easier to own, deploy and use

Volume Copy

Seamlessly clone volumes for re-purposing on different spindles and drives

Supported Integrations

vCenter & SRM integration to move live VMs at scale between sites; Automate storage mgmt. with SMI-S / SCVMM to run Hyper-V VMs

PowerVault Manager

Native HTML5 management interface for configuring, provisioning, managing, monitoring a single Titan T2000 array

CloudIQ

Cloud-native monitoring application that uses ML/AI and predictive analytics from telemetry gathered across thousands of systems to provide system health scores, anomaly detection & proactive remediation

Management Ecosystem

Integrate with Nagios Core/XI for auto-discovery, inventory, monitoring and provide increased scalability for unified datacenter management with OpenManage Enterprise (OME) integration

SupportAssist

An embedded protocol connected to Dell to help you proactively maintain the health of your T2000 array; Required for CloudIQ

Linear Mode: ADAPT, CloudIQ, CLI, Management, SupportAssist, Encryption
ADAPT: Autonomic Distributed Allocation Protection Technology
Virtual Mode: All software available for use

Titan T3000/3000X PBBA

(based on Dell PowerProtect DD6400)

About PBBAs

- Specifically store backup data sets in the format of the backup software
- High rates of data deduplication, effectively lowering \$/GB backup retention
- Highly efficient data replication to facilitate rapid backup from remote offices
- Protocol translation (e.g., S3, OpenStack) for data transfer to cloud repositories ("cloud tiering")
- Protecting against ransomware attacks and rapidly recovering from them by separating the control plane and the data plane with an "air gap"
- Can be used with almost any current backup/recovery software, and can be added to an existing environment

Titan T3000

Powered by Data Domain Operating System (DD OS)

Efficient

Up to 65x

reduction in storage requirements with variable-length deduplication

Gain industry leading **speed, scalability, and reliability**

Comprehensive

Widest protected workload ecosystem

ranges from physical to homegrown to virtual applications

Deploy protection storage however you want it – physical, software-defined or cloud-enabled

Cloud-enabled

Natively tier

deduplicated data to the cloud for long-term retention

Copy backed-up VMs to the public for disaster recovery

Titan T3000

Ideal for Commercial, smaller Enterprise & remote site Large Enterprise segments

TYPICALLY

65:1

Deduplication²

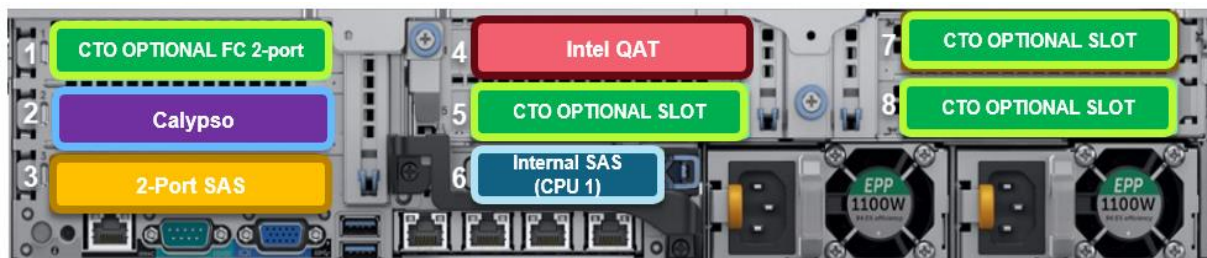

- Built on Dell PowerEdge Server 740xd 14G platform
- Internal capacity 32TBu
- Expansion capacity up to 172TBu
- Includes Compression card
- Bundles Cloud Tier, Boost, Replication
- 25 GbE card option
- 8TB drives only DDOS 7.7 and above

Model Specifications

	T3000	T3000X expansion
Chassis	2U	3U
Backup Throughput, TB/hr (DDBOOST)	24+	24+
Controller Upgrade Support	No	No
Capacity, Min	32 TBu	104TBu
Capacity, Max	172 TBu	172TBu
Network as configured	1x 4-Port 10GBASE-T 2x 4-Port 10G SFP+ (incl. optics)	
Cloud Tier Support	✓	✓
Retention Lock – Compliance	✓	✓
DD Boost/FC Backup Available	✓	✓
25GbE Available	✓	✓
Higher effective capacity (Compression Card)	✓	✓

Titan T3000 Hardware Platform

rNDC

PE R740xd - 12 drive slot version

- 2x Xeon CPU
- 192GB RAM
- 2x 750W PSU
- IO Slots: 1x rNDC, 3x Ethernet, 1x FC
- 2x SSD for OS
- 1x SSD for Cache
- 8x 8TB Data drives

Titan T3000 IO Card Options

Required rNDC Ethernet, 1x card:

- 4-port 10Gb BASE-T or
- 4-port 10Gb SFP

Optional Ethernet (CTO), up to 3x cards:

- 4-port 10Gb BASE-T
- 4-port 10Gb SFP
- 2-port 10/25Gb

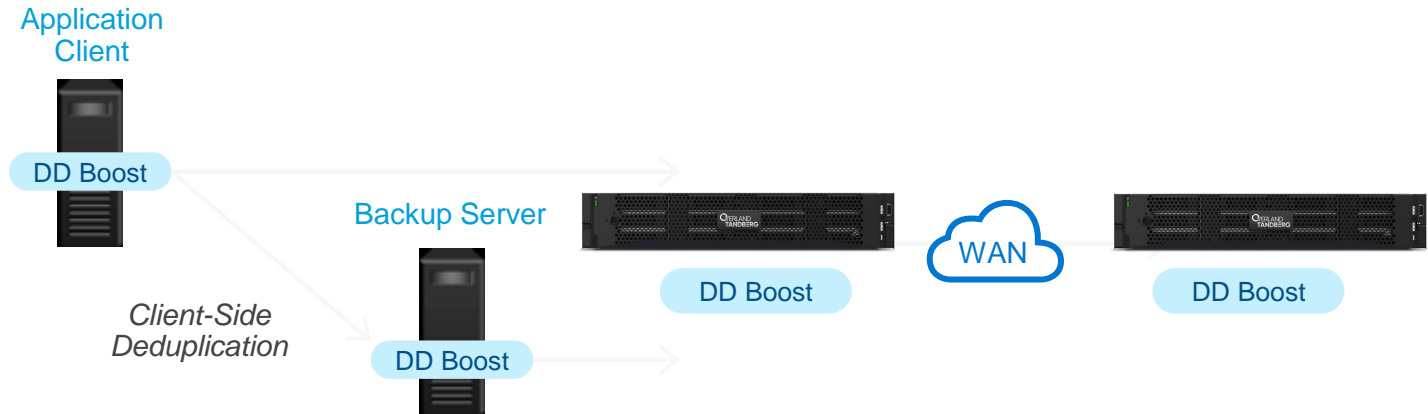

Optional Fibre Channel (CTO), 1x card,
dedicated slot:

- 2-port 16Gb FC

DD Boost: Faster, more efficient backup

- Advanced native integration with leading backup and enterprise applications
- Speeds backups by up to 50% (compared to CIFS/SMB)
- Efficient backup and replication, controlled by the app team
- Reduce network utilization by up to 98% (compared to CIFS/SMB)

Data Domain System

Cloud Tier: Expanded Support

Unparalleled efficiency for tiering protection storage to the cloud

Simple

automated, native tiering to public, private or hybrid cloud

Cost-effective

send and retrieve only unique data and reduce transactional overhead to lower TCO

Open

broad ecosystem and flexible deployment options

Titan T5000/T5000X Unified Storage

Based on Dell Unity XT380

O-T Titan T5000

Designed for **PERFORMANCE**

Optimized for **EFFICIENCY**

Built for **MULTI-CLOUD**

No Compromise Midrange Storage

Performance

- impressive performance to run virtualized environments and file storage at the same time

Efficiency

- 3:1 data reduction (depends on data structure)
- 85% system efficiency
- reputation for simplicity

Multi-Cloud

- Cloud Data Services
- Cloud Connected Systems
- Cloud Data Insights

Titan T5000 Configuration

T5000 – 2U/25 drives

T5000X – 2U/25 drives

Max Raw Capacity	System (3.84TB SSD)	96TB	
	Max. with encls. (1.6TB drives)	496TB	
Min/Max Drives		6/275	
Controllers		Dual (1.7GhZ CPU 12 Cores 2x Single-Socket)	
Controller Memory		64GB per controller	
Connectivity		10Gb iSCSI BaseT, 10/25Gb iSCSI Optical	12Gb SAS Backend
Max FAST cache per array		up to 800 GB	
Total cache		up to 928 GB	
Max. SAN hosts		512	
Max. number of pools		20	
HW Availability		5-9's (Dual controller mode only)	

Max. 250x drives or 10x Titan T5000X per BUS
(whichever limit is reached first)

Titan T5000 – Front View

- Single form factor for Unified (Block and File)
 - 25x Drive Slots capable of supporting:
 - SAS / SAS Flash
 - First 4x Drive Slots for System Drives
 - 2x Storage Processors per DPE
 - Storage Processor A (SP A) – Bottom half
 - Storage Processor B (SP B) – Top half
 - 2U in height (rack units)
- Each Storage Processor will contain a single M.2 device

Titan T5000 - Backplane

12Gb SAS
BACKEND
(2 per controller)

BUILT-IN
10Gbe ports
(2 per Controller)

MANAGEMENT
AND SERVICE PORT
(1+1 per Controller)

10GbE SFP+
(2 per Controller)

4-port 25/10GbE SFP+
(1 per Controller)

BUILT-IN 10GbE SFP+
(2 per Controller)

T5000 - Technical Specifications

Min/Max Drives	6/275
Chassis	2U
Drive bays	25x 2.5" SAS drives
Storage capacity (as configured)	96 TB (25x 3.84 TB SSD)
Maximum # of drives/enclosures	Max 250x drives or 10x Titan T5000X per BUS (whichever limit is reached first)
Max Raw Capacity	496TB
RAID Options	1/0, 5, 6
CPU per Array	2x Intel® CPUs, 12 cores per Array, 1.7GHz
System Memory/Cache per Array	128 GB
Max FAST Cache per Array	Up to 800 GB
Total Cache	Up to 928 GB
Max IO Modules per Array	4
IO Modules (as configured)	2x 4-port 25GbE SFP+ 2x 2-port 10GbE SFP+
Embedded SAS IO Ports per Array	4 x 4 lane 12Gb/s SAS ports for BE (back end) Connection
Max FE (front end) Total Ports per Array (all types)	24
Embedded 10Gbe Ports per Array	4x
Embedded CNA ports per Array	4x 10GbE SFP+
10/25 GbE/iSCSI total ports per array	8x 10GbE SFP+ 8x 25/10GbE

The quantity of drives can be configured in 5x steps (5, 10, 15, 20, 25)

Titan T5000X Enclosure

2U, 25-Drive 2.5" Enclosure

Supports 12Gb SAS and SAS Flash:

- 1.6TB 2.5" SAS, max. 40TB per Enclosure

Rules for SAS backend cabling:

Max of 250x drives or 10x DAEs per BUS (whichever limit is hit first)

Titan T5000 Software is All-Inclusive

No costly licensing makes it easier to own, deploy and use

Cloud-based Storage Analytics¹ Comprehensive health scores for storage	Thin Provisioning Maximize your available capacity	Unified Management Configure & manage file, block, vVol objects	Central Management Manage multiple T5000 systems	Dynamic Pools Faster drive rebuild times & save costs	CSI Plug-in¹ Easily deploy and consolidate containerized workloads with Kubernetes
Unified Sync & Async Replication Throttling, full copy avoidance, interface pairing, snapshots	Compression & Deduplication Advanced inline data reduction with zero detect	Software Defined Storage¹ HA file/block storage to run on premise or on AWS in VCF	Cloud Tiering Appliance¹ Automated, policy-based unified data tiering to clouds	REST API Connect interactive apps with web svcs	
CEE/CAVA Framework Easily connect to popular anti-virus solutions	Data At Rest Encryption Protect all business data residing in the array	QoS (Host IO Limits) Limit host IO and bandwidth to specified block resources	File Level Retention Protect files from modification or deletion	Virtualization Integration Vmware, Microsoft, OpenStack	IP Multi-Tenancy Assign isolated partitions to NAS Servers

Titan T6000

Archive NAS Platform

(based on Dell PowerScale A300)

Titan T6000

High performance, nearline, active archive

Form factor	4U
Chassis Capacity	240TB
SATA HDD drives (3.5") per Chassis	60
Raw node capacity	60TB
ECC memory (per node)	96GB
Nodes per cluster	4 to 252
Cache (per node) solid state drives 1.6TB	1
Raw cluster capacity	60TB to 75PB
Front-end networking (per node)	2 x 25GbE (SFP28)
Infrastructure networking (per node)	2 x 25GbE (SFP28)
Inline Data Reduction	Yes

Titan T6000 Architecture

- Each platform node contains CPU, memory, disk, and I/O controllers 4U rack-mountable chassis.
- Redundant Ethernet adapters provide a high-speed back-end cluster interconnection
- Highly available storage client access is provided over multiple 25Gb/s Ethernet interface controllers within each node
- various file and object protocols, including NFS, SMB, S3, and HDFS
- full support for both IPv4 and IPv6 environments

Simplicity at Scale

Enterprise class scale-out data services

Any Scale

From 240TB to multi-PB
scale and millions of file
operations

No Node Left Behind

Non-disruptive tech refresh,
Add nodes in 60 seconds

AutoBalance [®]

Smart scale-out cluster
ensures no hot spots

Resilient

Sustain multi-node failures
with no data loss

Efficient

Inline data reduction and
automated tiering

DevOps Ready

New Ansible Kubernetes &
OpenShift integrations

Inline Data Reduction

- Data Reduction Platform
- Compression Engine and Chunk Map
- Zero block removal phase
- Deduplication In-memory Index and Shadow Store Infrastructure
- Data Reduction Alerting and Reporting Framework
- Data Reduction Control Path

The inline data reduction write path consists of three main phases:

- Zero Block Removal
- In-line Deduplication
- In-line Compression

If both inline compression and deduplication are enabled on a cluster, zero block removal is performed first, followed by deduplication, and then compression. This order allows each phase to reduce the scope of work each subsequent phase has to perform.

OneFS Software Features 1/2

Software	Feature	Description
SMARTDEDUPE	Data management	Increase efficiency and reduce storage capacity requirements with deduplication of redundant data across multiple sources
CLOUDIQ	Data management	Simplify the storage management tasks of PowerScale, Isilon and other Overland-Tandberg hardware with predictive analytics capabilities from a single console
DATAIQ	Data management	Locate, access and manage data and gain a holistic view across heterogeneous storage systems with a single pane of glass
SMARTQUOTAS	Data management	Assign and manage quotas at the cluster, directory, user, and group levels
INSIGHTIQ	Performance management	Performance monitoring and reporting

OneFS Software Features 2/2

Software	Feature	Description
SNAPSHOTIQ	Data protection	Protect data efficiently and speed the recovery of critical data with ondemand snapshot restores
SMARTLOCK	Data retention	Protect your critical data against accidental, premature, or malicious alteration or deletion and meet compliance and governance needs
SMARTCONNECT	Data access	Enable client connection load balancing and the dynamic failover and failback of client connections
CLOUDPOOLS	Resource management	Seamless tiering of cold or frozen data to public or private cloud providers
SYNCIQ	Data replication	Securely replicate data sets to multiple sites for reliable disaster recovery and use push-button failover and failback
SMARTSYNC	Replication	Replicates data between T6000 systems and also public clouds like Microsoft Azure and AWS

Any Data

Enterprise class unstructured data services with simultaneous multi-protocol support

Any client

Access to all data at the same time

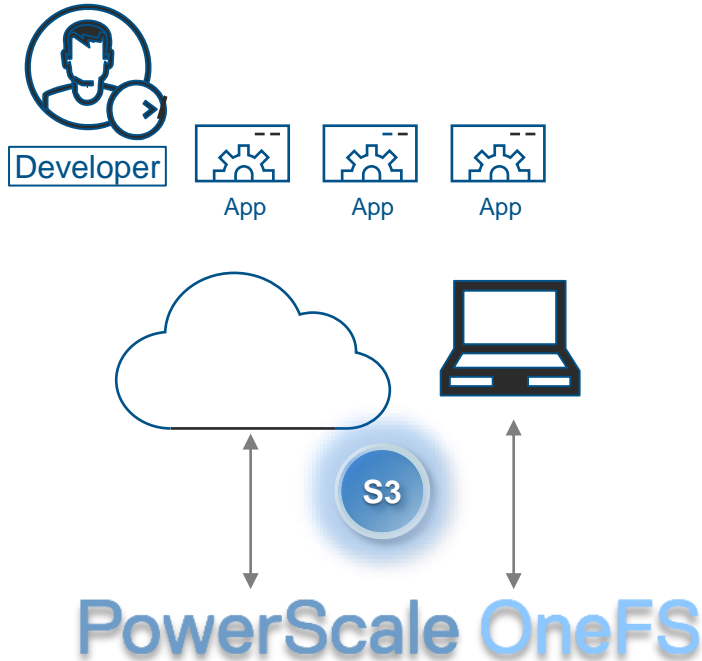

Any user

Empower users to get what they need

Introducing S3 access

DATA READ & WRITE

All data simultaneously read and write through any protocol

DATA MIGRATION & COPIES

No need to migrate & copy data to / from secondary source

DATA CONSOLIDATION

File & object access on the same platform

The background is a solid blue color with a complex, abstract pattern of white lines and dots. The lines form a network of interconnected nodes, with some lines curving and flowing across the page, creating a sense of movement and connectivity. The dots are small and serve as nodes in the network.
