RDX QuadPAK®

Professional Rackmount Kit for RDX® QuikStor® Drives

Key Benefits

- **RDX rackmount solution**
  Best value solution for utilising RDX within a 19" rack.

- **Scalability**
  Install up to 4 RDX external systems, increasing capacity and performance.

- **Flexibility**
  If multiple RDX systems are installed, media spanning and media rotation can be easily established.

- **Usability**
  Add or remove RDX systems in seconds, all screws and parts are accessible from the front. No need to pull QuadPAK outside the rack.

- **Compatibility**
  Compact design fully compatible with all 19" racks.

The Overland-Tandberg RDX QuadPAK provides an easy to use and highly affordable rackmount solution for RDX customers. The RDX QuadPAK allows up to 4 RDX external systems to be securely installed in a 19" rack to simplify backup and restore operations. This enables RDX to coexist with other IT equipment like servers, disk systems and network components in one rack.

RDX QuikStor rackmount integration

When utilising RDX systems in a datacentre, there was always the question as to where to place them into the existing server rack. So external RDX systems often have been arranged on top of the servers, where they could get out of place. Also cabling could not be properly installed. The QuadPAK 1.5U rackmount kit is the solution for integrating up to four external RDX USB 3.0 systems in a professional manner in your 19" rack cabinet.

Why four RDX QuikStor Systems?

Multiple Servers, Media Spanning, Media Rotation

The RDX QuadPAK enables you to install up to four servers with their own RDX drive for backup, disaster recovery or data exchange. Furthermore, the ability to install multiple RDX systems enables enhanced functionalities like media spanning or media rotation. Backup can easily be extended to multiple media (if feature is supported in backup software). In addition, media rotation can be established, so backups could be performed on different media for disaster recovery without user interaction.
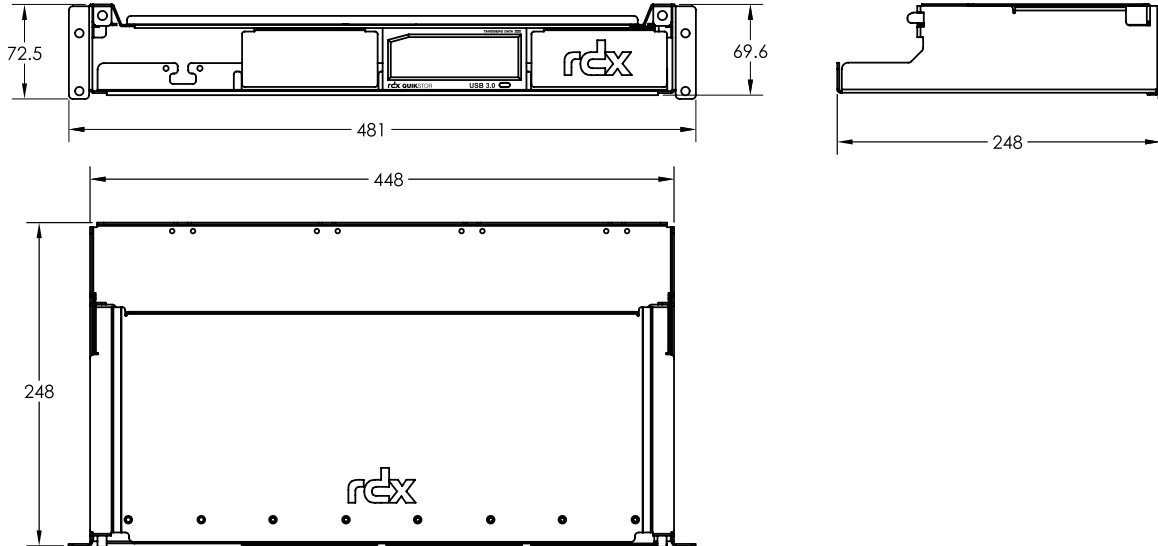

Easy installation and easy handling

The RDX QuadPAK rackmount solution is 1.5U high and allows up to four RDX external systems to be securely installed in a 19" rack. The RDX QuadPAK is easy to install and use, additional RDX systems can be added or removed in seconds by loosening two thumbscrews, enabling customers to increase backup capacity and performance when they need it most. The RDX QuadPAK includes a cable restraint to prevent the USB interface or power cable from being accidentally disconnected.

Note: RDX QuadPAK rackmount solution supports only Overland-Tandberg RDX QuikStor external systems. Systems must be ordered separately.

Specifications	Rack-mountable chassis for external RDX systems
Compatibility	Compatible to all external Overland-Tandberg RDX QuikStor drives*
Number of installable RDX drives	1 - 4
Enclosed accessories	3 bezels, bezel screws, rack mount screws, zip ties
Form factor	1.5U, 19" rack cabinet
Dimension (HxWxL)	
Physical package	72.5 x 481 x 248 mm (2.85 x 18.94 x 9.45 in.) 150 x 616 x 350 mm (5.9 x 24.22 x 13.78 in.)
Weight	
QuadPAK shipping weight	2.66 kg (5.86 lbs.) 4.2 kg (9.26 lbs.)

* must be purchased separately

Sales and support for Overland-Tandberg products and solutions are available in over 100 countries.
